We Are Now Able to Offer Superior Quality Tulips

We Pampered Them Like RARE GEMS

Many of the Tulips listed herein are uncatalogued by anyone else in the country; most of them do not appear in our own catalog as issued last spring. The reason is that these rarer, lovelier Tulip types from Old-World sources, were deprived us by the war. Nelis met the situation by withholding our own precious stock of these varieties from the market, and planting them for propagation. They were given ideal care under controlled conditions, helped along by soil and climatic conditions of the best. The bulbs have multiplied beyond expectations, and are far superior to anything the Old World has ever given us. **New Strength and vitality have been bred into them. They are now yours to enjoy—splendid top-size bulbs that will reward you handsomely. Order your choice of these Tulip gems now, before the limited quantity is exhausted.**

Vesper Iris

(Dichotoma)

New and Different!

The beautiful filigree of graceful branches of the Vesper Iris is studded with from one to two hundred jewel-like flowers, truly a mammoth bouquet. The delicately colored blossoms, which at a little distance somewhat resemble a multitude of gorgeous butterflies at rest, with motionless, outstretched wings, vary in color, including such hues as cool translucent lavender, with markings of mahogany, copper, lemon, orange, brown or Tyrian.

The Vesper Iris, which is exceedingly easy to grow, blooms for a month, during July and August, when flowers are scarce. Resists both severe cold and intense heat with impunity.

Be the first one in your locality to grow this unique Iris! 3 for \$7.50; 8 for \$15.00.

NEW PHLOX NIVALIS SYLVESTRIS

We cannot praise this new Phlox too highly. It is radically different from any of the Phlox Subulata type, and was classified "Nivalis" by Prof. Edgar T. Wherry, of the University of Pennsylvania. Very outstanding, color cyclamen-pink, and of redder shade than "Vivid."
